

Database Analyst (SAS Programmer) – Tallahassee, FL

An established national consulting firm has an immediate opening in our Tallahassee office for a qualified Database Analyst. Applicants must possess an excellent understanding of complex databases. Database Analysts design, analyze, and develop database structures, and develop and execute key statistical procedures for data development and statistical analysis. Database Analysts also consult with case and project managers to establish parameters and methods of an analysis and to identify the most efficient means of performing analysis.

Bachelor degree in Computer Science, Accounting, Economics, Mathematics, Statistics, or related discipline required. Experience in quantitative analysis and statistical programming in SAS preferred.

REQUIRED SKILLS:

- Experience programming in SAS.
- Applying mathematical and statistical methods to client data.
- Processing, compiling, and analyzing extremely large datasets.

RESPONSIBILITIES:

- Develops, writes, tests, and executes new programs and procedures for database development and statistical analysis.
- Reviews data for completeness and accuracy.

For detailed qualifications and an opportunity to be a part of this dynamic research oriented firm, please submit your resume online at www.ersgroup.com.
