

POSITION Director of Statistics

.....

Job Description:

At Kforce Clinical Research, we don't just offer jobs. We offer a rewarding career experience, complete with professional development opportunities and a great benefits package! We are intelligent business partners to some of the world's most valued pharmaceutical companies and have evolved to create models of operational excellence that incorporate Lean and Six Sigma philosophies. Using these tools, Kforce is able to better plan and anticipate workloads and thus minimize the peaks of work that can swamp you. This allows you to stay just as dedicated and still strike a balance between work and home.

Currently, one of our top clients is in search of an exceptional Director of Statistics in Cambridge, MA. The Director of Statistics provides leadership and guidance as the statistical expert on a project team for Oncology projects. For one or more projects, this role will be accountable for all statistical aspects of clinical studies and submissions, including quality, relevance to regulatory perspective, and scientific validity. The Director of Statistics acts as key statistical consultant within company is responsible for project staffing, resource planning and allocation within the projects and assisting Department Head with creation and implementation of policies. The Director of Statistics may have regional or global management responsibility.

Specific Accountabilities:

- Oversee statistical support to multiple project teams

- Collaborate with clinical and regulatory leads in defining general strategic approach, creating clinical development plans (CDP), and producing individual protocols

- Work independently, or with other statistical departmental members or consultants, to develop effective statistical approaches applicable to project

- Statistically valid CDP involving one or more studies designed to lead to a key decision point or submission. CDP, related protocols, and statistical analysis plans (SAP) consistent with overall project objectives

Requirements:

- PH.D. in statistics or related discipline
- 7+ years of pharmaceutical experience, at least 5 years in Oncology, including significant interactions with regulatory bodies, history of successful management (4+ years), and expertise in one or more therapeutic areas
- Knowledge of regulatory guidelines / procedures in- and outside of US and Europe
- Leadership role in societies or committees relevant to drug development or statistics
- Ability to contribute to advancement of statistical or applied specialized area of knowledge
- Experience managing direct reports, assembling teams, and implementing working relationships with external agencies, such as CRO, consultant groups, and research committees
- Ability to work in a fully self-directed manner

Due to the precise requirements of this position, we will only be contacting candidates that meet all of the listed criteria.

Kforce Clinical Research has been serving the pharmaceutical industry since 1988. We are truly a career destination and the employer of choice for skilled, dedicated professionals like you. At Kforce, one of our core principles is: Great People = Great

Results! This means that we will work to find you the right career match through exceptional customer service, a disciplined process, and personal respect. If you are qualified and interested in the excellent career opportunities we have for you, apply today!
