Postdoctoral Fellow (Dr. Montse Fuentes and Dr. Brian Reich)

The Department of Statistics at North Carolina State University invites applications for a postdoctoral position with Professors Montse Fuentes and Brian Reich as the primary mentors through STATMOS (Statistics in the Atmospheric and Oceanic Sciences), an NSF-funded network, which emphasizes interdisciplinary and multi-institution research. For more information, including a list of participating institutions, see http://www.statmos.washington.edu/

The focus of this position is the development of new methodological and computational techniques for complex spatial-temporal datasets with applications to climatology, meteorology, epidemiology. Specific areas of interest include large spatial datasets, non-Gaussian processes, and statistical downscaling.

Qualifications

A PhD in statistics, biostatistics, or a related field is required. Criteria for selection include demonstrated research ability in statistical methodology development. Verbal and written communication skills are also important. Members of under-represented demographic groups are particularly encouraged to apply.

To view more information about the position, visit http://jobs.ncsu.edu/postings/50735. To apply, applicants must complete an applicant profile and attach a letter of application, curriculum vitae, and contact information for two references.

All applicants will be considered until the position is filled.

North Carolina State University is an equal opportunity and affirmative action employer. In addition, NC State welcomes all persons without regard to sexual orientation or genetic information. Individuals with disabilities desiring accommodations in the application process should call (919) 515-3148.

For more information about the departments, see http://www.stat.ncsu.edu

Postdoctoral Research Scholar (Dr. Montse Fuentes and Dr. Brian Reich)

The Department of Statistics at North Carolina State University invites applications for a postdoctoral position with Professors Montse Fuentes and Brian Reich as the primary mentors.

This position will be jointly funded through a grant from the National Institutes of Health (NIH) and the Department of Interior (DOI). The focus of this position is the development of new methodological and computational techniques for complex spatial-temporal datasets with applications to climatology, meteorology, epidemiology and human health. Specific areas of interest include large spatial datasets, non-Gaussian processes, and statistical downscaling.
