

We are looking for a statistician that is skilled in cluster, meta-analysis, HLM, SEM/growth curves, time-series, discriminate, survival, and mixed models. Applicant should also be very familiar with R, have excellent verbal and written communication, be willing to learn/teach, and work well with colleagues. Benefits include health insurance, 401K, 2 weeks paid vacation and a fun and relaxed work environment.

Should you know of anyone that meets our requirements, please forward our information to them to contact our office by telephone or email.
