Transforming Lives

The University of Miami is among the top research universities and academic medical centers in the nation, and one of the largest private employers in South Florida.

With more than 16,000 faculty and staff, the University strives for excellence, and is driven by a powerful mission to transform and impact the lives of its students, patients, members of the community, and people across the globe.

The University is committed to fostering a culture of belonging, where everyone feels valued and has the opportunity to add value. Through values of Diversity, Integrity, Responsibility, Excellence, Compassion, Creativity, and Teamwork (DIRECCT) the U community works together to create an environment driven by purpose, excellence, community, and service.

1. Formulates analysis plans and writes detailed specifications for analysis of files, consistency checks, tables, and figures.
2. Communicates with clients regarding statistical analysis issues.
3. Interprets analyses and writes statistical sections of study reports.
4. Prepares results for progress reports, presentations, and peer-reviewed publications.
5. Maintains and documents studies’ databases.
6. Consults with study investigators on planning and specifying statistical analysis.
7. Provides support to resolve barriers to analysis and consults with other methodologists and statisticians.
8. Adheres to University and unit-level policies and procedures and safeguards University assets.

Department specific functions

Under the direction of the Analytic Project Manager(s) and Project PI’s, the Biostatistician will provide statistical support for the Genetic Epidemiology Core within the Hussman Institute for Human Genomics. For this position, the Biostatistician is expected to be proficient with statistical software, particularly R or SAS. We work with large genetic data sets, and the individual should be familiar with QC and data analysis as well as final interpretation.
The University of Miami offers competitive salaries and a comprehensive benefits package including medical, dental, tuition remission and more.

UHealth—University of Miami Health System, South Florida's only university-based health system, provides leading-edge patient care powered by the groundbreaking research and medical education at the Miller School of Medicine. As an academic medical center, we are proud to serve South Florida, Latin America and the Caribbean. Our physicians represent more than 100 specialties and sub-specialties, and have more than one million patient encounters each year. Our tradition of excellence has earned worldwide recognition for outstanding teaching, research and patient care. We're the challenge you've been looking for.

Patient safety is a top priority. As a result, during the Influenza ("the flu") season (September through April), the University Of Miami Miller School Of Medicine requires all employees who provide ongoing services to patients, work in a location (all Hospitals and clinics) where patient care is provided, or work in patient care or clinical care areas, to have an annual influenza vaccination. Failure to meet this requirement will result in rescinding or termination of employment.

The University of Miami is an Equal Opportunity Employer - Females/Minorities/Protected Veterans/Individuals with Disabilities are encouraged to apply. Applicants and employees are protected from discrimination based on certain categories protected by Federal law. Click here for additional information.
