

The Department of Statistics at FSU has established a tradition of excellence in the scholarly work of its faculty, effectiveness of its educational programs, and in service to the university, to the state, and to the nation. Our faculty are recognized authorities in their areas and make significant contributions to research and disseminate the results of their research on a broad scale. Faculty are active in major national and international professional association meetings and are group leaders of national statistics research programs, members on national and international panels for grant applications, reviewers for statistics and probability journals, and members on organizing or program committees at international statistics and probability meetings. Our faculty have generated substantial amounts of external grant support in the last ten years. We support interdisciplinary collaborative research with several other colleges and departments, including economics, computer science, psychology, biology, oceanography, meteorology, geography, mathematics, and several departments in the medical school.

We have experienced rapid growth in the last 10 years with both undergraduate and graduate student enrollment increasing continually and significantly. The recognition of job opportunities for those with analytic and data management skills has led to a dramatic increase in the number of undergraduate students majoring in statistics, from 31 in 2011 to over 130 in the fall of 2020, more than a 300% increase. This increase in undergraduate majors has created the necessity to develop and offer additional upper-division statistics courses. We recently hired an additional staff member to assist with undergraduate advising. We plan to hire 10 or more tenure-track faculty members in the next five years to help us continue to strengthen our academic and research goals.

In the fall of 2020 our graduate enrollment was 194 students, the largest graduate program in the College of Arts & Sciences in the last five years. This increased enrollment contributed significantly to the desired university increase in graduate credit hours. The graduate program in our department is one of the most diverse programs in the nation. Currently we have four master's programs in the department: the five-year combined BS/MS degree in Statistics; the Master's in Applied Statistics, the Master's in Biostatistics; and the Master's in Mathematical Statistics. At the doctoral level, we offer PhDs in both Statistics and Biostatistics.

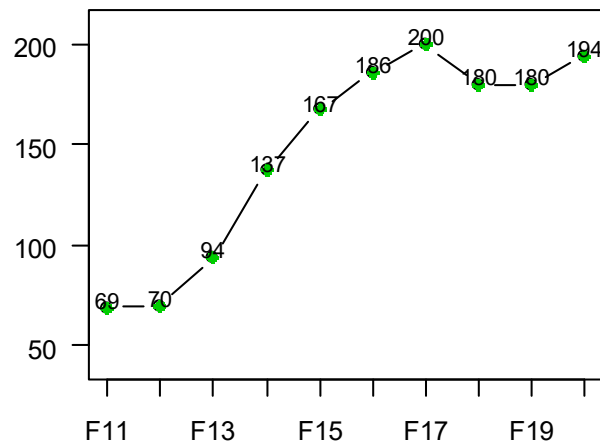

We look forward to recruiting new faculty members with exciting research and academic careers ahead of them to join our team. We are recruiting for 3 Assistant Professor positions to start in the Fall of 2022 with specialties in Biostatistics, Data Science, and Computational Statistics.

Growth of Statistics Department in the Last 10 Years

**UnderGraduate Headcount
More than a 300% increase**

**Graduate Headcount
More than a 180% increase**

**Student Credit Hours
About a 40% increase**

**PhD and MS Graduated
About a 90% increase**

The Department of Statistics at Florida State University invites applications for a tenure-track Assistant Professor specializing in **Biostatistics** for a nine-month appointment beginning August 2022. A Doctoral degree from an accredited institution or the highest degree appropriate in Statistics, Biostatistics, or a related field with a demonstrated record of achievement in teaching, academic research and service is required. The degree should be conferred before August 2022.

Please apply at www.jobs.fsu.edu (Job ID 49818). Additionally, three confidential independent letters of support are required to be sent through the FSU system. Review of applications begins immediately. The deadline for applications is 12/01/2021. An Equal Opportunity/Access/Affirmative Action/Pro Disabled & Veteran Employer. FSU's Equal Opportunity Statement can be accessed at:

http://www.hr.fsu.edu/PDF/Publications/diversity/EEO_Statement.pdf

One of the nation's elite research universities, Florida State University preserves, expands, and disseminates knowledge in the sciences, technology, arts, humanities, and professions, while embracing a philosophy of learning strongly rooted in the traditions of the liberal arts and critical thinking. Founded in 1851, Florida State University is the oldest continuous site of higher education in Florida. FSU is a community steeped in tradition that fosters research, encourages creativity, and embraces diversity. At FSU, there's the excitement of being part of a vibrant academic and professional community, surrounded by people whose ideas are shaping tomorrow's news!
