Opening for Postdoctoral Fellow Position in Biostatistics at MD Anderson Cancer Center

A full-time postdoctoral fellow position is available in Professor Wenyi Wang's lab in the Department of Bioinformatics and Computational Biology at The University of Texas MD Anderson Cancer Center in Houston, Texas.

Dr. Wang's laboratory research aims to gain new knowledge in the evolution of the human genome and the cancer genome. These two topics are fundamental to the understanding of the initiation, progression, and treatment of human diseases. This position will perform methodological research under her long-standing program in semi-parametric survival modeling for cancer risk prediction.

The position will involve a mixture of methodological and collaborative research in biostatistics. The methodological research may include but is not limited to machine learning methods for time-to-event modeling and multivariate statistics. The collaborative research may include but is not limited to software tool dissemination into clinical practice, electronic health record data processing, and participation in the multi-institutional efforts in studying clinical genetics. This position will require writing statistical/biostatistical manuscripts, assisting in writing biomedical manuscripts, developing/maintaining statistical software packages, and other academic activities.

For further information, visit the lab website at <https://odin.mdacc.tmc.edu/~wwang7/>.

Position Qualifications

The ideal candidate should have a Ph.D. in statistics, biostatistics, or a related field. The candidate must have excellent written and verbal communication skills, the ability to engage in independent thinking, be meticulous in their attitude towards work, and be collegial as a team member. The candidate must demonstrate scholarship through at least two published first-author manuscripts.

Salary: \$70k and above.

Application

To apply, please email (1) a cover letter describing current and future research, (2) a curriculum vitae, and (3) a list of three references to Dr. Wenyi Wang at wwang7@mdanderson.org.

About MD Anderson

The University of Texas MD Anderson Cancer Center in Houston ranks as one of the world's most respected centers focused on cancer patient care, research, education and prevention. The institution's sole mission is to end cancer for patients and their families around the world. MD Anderson is one of only 51 comprehensive cancer centers designated by the National Cancer Institute (NCI). MD Anderson is ranked No. 1 for cancer care in U.S. News & World Report's Best Hospitals survey. It has ranked as one of the nation's top two hospitals for cancer care since the survey began in 1990. MD Anderson receives a cancer center support grant from the NCI of the National Institutes of Health (P30 CA016672).
