High Point University invites applications for a tenure-track position in statistics in the Department of Mathematical Sciences beginning August 2019. The department has a healthy Actuarial Science program and has just begun a new major and minor in Data Analytics and Statistics. We are looking for an individual interested in helping to develop and grow this program while contributing to the existing actuarial science major.

QUALIFICATIONS:
- Education:
  - PhD in applied statistics or closely related field.
- Experience and Training:
  - Candidates with experience using SAS or R are encouraged to apply.
  - Candidates with teaching experience are preferred.

ESSENTIAL FUNCTIONS:
- Position responsibilities include: teaching three courses per semester, professional development, student advising, and university service.
- Teaching responsibilities may include both introductory and upper-level statistics courses.

APPLICATION INSTRUCTIONS:
Applications should include a cover letter addressing the applicant’s qualifications and interest in the position as well as a current CV. Please include a list of references on the CV, at least one of whom can speak to the applicant’s potential or experience in teaching. Applications should be submitted in a single uploaded document at https://highpoint.wd1.myworkdayjobs.com/HighPoint (search “statistics”). Applications received by October 1, 2018 will receive full consideration.

For additional information regarding this position, please contact Dr. Jenny Fuselier at jfuselie@highpoint.edu.
