

## **Multiple Lecturer Positions available with the Department of Mathematics and Statistics at Northern Arizona University**

The Department of Mathematics & Statistics seeks to fill multiple Lecturer positions for the 2018-19 academic year. These require a doctorate in mathematics, mathematics education, or statistics, in hand or expected by August 20, 2018. The positions are non-tenure eligible, but are renewable pending satisfactory job performance, availability of funding, and program needs.

Lecturer positions are primarily teaching positions, but there is a small expectation in research and scholarship. The department has four weekly seminars and active faculty researchers working and publishing in algebra, combinatorics, topology, differential equations, numerical analysis, applied mathematics, statistics, and mathematics education. The department is very supportive of the professional development of young faculty.
