

Design methodologies for Pragmatic Clinical Trials with Patient-Centered Outcomes

A postdoctoral training position is available with [Dr. Song Zhang](#) in the Department of Clinical Sciences in the [Division of Biostatistics](#) to enhance research capacity in the development of design methodologies for pragmatic clinical trials with patient-centered outcomes. The appointment is nominally for two years. This opportunity will provide the successful candidate to engage in mentored research and gain research experience in the development and application of state-of-the-art clinical trial design methodologies.

The successful candidate will work with senior faculties to tailor postdoctoral work to meet individualized learning needs, further develop research knowledge and skills, and establish their own program of research.

Eligible applicants must meet all of the following criteria:

- Completion of a PhD in *statistics OR biostatistics*;
- Excellent oral and written communication skills;
- Extensive experience in programming languages such as R and C.

Interested individuals should send a CV, a research statement describing their interests and accomplishments, and a list of three references to:

Song Zhang, Ph.D.

song.zhang@utsouthwestern.edu.

Information on the UTSW postdoctoral training program and benefits can be found at <http://www.utsouthwestern.edu/postdocs>.

*UT Southwestern Medical Center is an Affirmative Action/Equal Opportunity Employer.
Women, minorities, veterans and individuals with disabilities are strongly encouraged to apply.*
